#2 – Services

for all R&I actors

OPENAIRE SERVICES IN A NUTSHELL

1

Tracking open research

Reproducibility and transparency require tracking of all outcomes of **science** and related “context”

2

Discovering open research

Discovery of **reproducible science** outcomes must find new ways, driven by “**scientific intentions**” that go beyond the “find articles related to a research topic”

3

Assessing & monitoring (open) research

Monitoring quality, impact, and “**open scienceness**” of science should be a transparent, reproducible process for all, inclusive of research “context”
